LOOKING FOR LOUSY WEATHER?

Furuno's new FAX-108 and FAX-143 MkII will show you the worst, best and anything in between on your choice of 10 or 14-inch aluminized paper. Plus wind, wave, front and surface temperatures sharper and clearer than you've ever seen.

Programmed to receive 512 channels, both synthesized fax units tune in any weather station on earth with just 3 knobs, eliminating any necessity to memorize long strings of frequencies. Fully automatic, they respond to WMO station stop/start signals, select appropriate scanning speed, paper speed and IOC. You can put either fax unit on board for far less than you'd think. See them at any of our more than 200 authorized dealer outlets.

Boat owners know exactly who to turn to when they want reliable marine products. ITT Jabsco. We're the best-known name in the business, with the widest variety of products for everything from small sailboats to large motor yachts. And now, we've added some new products to make your boating pleasure all the more pleasurable.

Jabsco is number one in high-quality fresh-water systems. Now we're

even better, with our new Pressure Max™. This system feeds fresh water to all the fixtures on your boat with smooth, high-pressure flow. So you

can shower, drink, do the dishes or anything else, all at the same time, without interruption. For all the comforts of a luxury home at sea.

Pressure Max features an electronic sensor which shuts down the pump when the water has run out, to prevent damage. Our Deck Wash version does not have this feature, making it ideal for raw-water washdown.

ITT Jabsco has long been known for its high-capacity bilge pumps.
